Silver Redcedar—slightly trimmed

GENEVA - OHIO

To Our Customers and Friends:

We are happy to send you our Baby Evergreen and Shrub catalog. You will find great pleasure in growing our trees and shrubs as well as our berries. Many of our customers have written us expressing the satisfaction derived from raising our stock.

Although costs have increased, we are not increasing prices this spring. We are quoting our stock as low as we possibly can. Take advantage of this price list now in order to save dollars.

Our shipping season begins as soon as the frost is out of the ground and trees can be dug. It continues until the first of June, weather permitting.

We recommend transplanted trees for planting in permanent locations or field rows. Seedlings can be bedded 4 in. by 4 in. and shaded for one year. They can be set out in field rows the following year.

Seeds. Each year we offer a number of varieties of evergreen seeds which have proven hardy. These seeds are collected from northern climates. For pleasure and experience, we recommend growing seeds.

Rooted Cuttings. These are tips from branches rooted in sand. They average from 4 to 8 inches, depending on the variety. Cuttings are made from most plants which do not bear seeds and also from trees, to assure trueness to type. Most selected specimens can only be made by cuttings. These can be handled, bedded and shaded similar to seedlings. This is a reasonable way to get started with many fine varieties.

Packing Costs. Some nurserymen make an extra charge of 10 per cent for most packing and 15 to 25 per cent of the cost for packing larger evergreens. We supply high quality stock. Girard Bros.' trees are grown where they grow best by specialists who have the soil and who know how to grow and pack trees. We do not charge for packing.

Planting Guide. We issue a 15-page planting guide with each order, large or small.

We solicit your orders and assure you that they will be filled to the best of our ability. We try our best to satisfy all of our customers.

Yours very truly,

THE GIRARD BROS. NURSERY.

For Evergreens, Lawns, Gardens, Seed Beds

BEAVER PEAT HUMUS

Beaver Peat is a rich dark brown color. Centuries of time were required to make it. Years of growth of ferns, mosses, grasses and fibrous plants, falling and decaying, aided by nature, completed the task of forming it. In Beaver Peat you get America's finest garden soil organic; a humus source that gives life-giving properties to soils the moment you dig it in—that retains its identity in the soil for many years. It is not to be compared with, or confused with, muck.

Valuable for Evergreens. When young seedlings or transplants go to the field, place a small handful of wet peat over the roots, then cover with earth. This practically insures the life of the tree when dry weather comes later in the summer. Half a shovelful placed around the roots of larger evergreens is of great benefit. Azaleas, Ilex, Kalmia, Leucothoe, Mahonia, Rhododendron, all thrive with peat around their roots.

Mulching or Top Dressing. Cover all perennial beds with from one to two inches of Beaver Peat. Evergreens, ferns, lillies, rhododendrons, etc., may be covered up to three inch depth if found necessary.

For Flower and Vegetable Beds. Beaver Peat is used with fine results in vegetable gardens and flower beds by working into the soil such quantities as are necessary to make the soil soft and pliable.

Lawn Covering. Apply Beaver Peat to a depth of one-fourth inch late in the autumn or in the spring. The grass will come up through leaving a good humus which will help keep your lawn from burning. Spotty lawns can be cured—old lawns can be rejuvenated, new lawns can be assured long years of health and beauty.

No Weed Seed. Beaver Peat contains no weed seed, fungi or other impurities; it is dehydrated and pulverized thus making it exempt from Japanese Beetle quarantine. In reaction, it is very slightly acid with high organic matter content.

Domestic Peat shipped direct from the pits in Ohio.

1 — 100 lb. bag	\$ 1.80
2 — 100 lb. bags.....	3.40
5 — 100 lb. bags.....	8.00
10 — 100 lb. bags.....	14.00
20 — 100 lb. bags.....	26.00

Order early, then you will have it when needed. Should be shipped by freight. Bags weigh about 100 pounds each.

HOTBED KITS

Many of our customers do not know we have one of the finest hotbed kits made.

No. 10—Home gardener's kit, for 3x6 hotbed. Contains 40 feet of 200 watt insulated cable, 500 watt 115 volt AC thermostat with a connector plug for attaching to outlet, pilot light and control knob for setting temperature. Set of instructions. Protects 3x6 sashes against frost. Postpaid \$5.35.

No. 20—For 6x6 hotbed. Contains 80 feet of 400 watt insulated electric cable, one 500 watt thermostat as outlined above, set of instructions. Protects six 3x6 sashes against frost. Easy to install. Postpaid \$6.95.

PINK FLOWERING DOGWOOD

JAPANESE YEWS

Spreading Japanese Yew

Yews are strictly ornamental and have a wide range of uses. Best for shady spots. Foliage is rich and attractive. The coldest winters or the bitterest of winds never injure their foliage. Best subject for hedges. If not allowed to suffer from dry weather, development is rapid.

Yew Foliage

Hick's Yew

Hatfield Yew

Dwarf Japanese Yew

Upright Japanese Yew

Japanese Yews have in recent years rapidly attained the position of first importance among the Evergreens. In an effort to provide the trade with Evergreens in greatest demand, we have developed a stock of the various forms, several of which are illustrated on this page. Further illustrations and full descriptions are given on the following page. All of these forms are strictly hardy, strong, vigorous growers which we can recommend to our customers.

SPREADING JAPANESE YEW
(*Taxus cuspidata*)

UPRIGHT JAPANESE YEW
(*Taxus cuspidata capitata*)

TAXUS - YEWS

HEAVY PRUNED TREES—From Field Rows, Balled and Burlapped

<i>Taxus Brevifolia Nana</i> (Dwarf Yew).....	12-16 inch	\$4.00	Dwarf, bushy.
<i>Taxus Cuspidata</i> (Japanese Spreading).....	15-18 inch	4.00	Bushy and low spreading.
<i>Taxus Capitata</i> (Japanese Upright).....	15-18 inch	4.00	Pyramid type.
<i>Taxus Intermedia</i> (Intermedia Yew).....	15-18 inch	4.00	Medium spreader.
<i>Taxus Hatfieldi</i> (Hatfield Yew).....	15-18 inch	4.00	Broad, pyramidal.
<i>Taxus Hicksi</i> (Hick's Yew).....	15-18 inch	4.00	Narrow, upright.
<i>Taxus Andersoni</i> (Anderson's Yew).....	15-18 inch	4.00	Graceful, spreading branches.
All above specimens F.O.B. Geneva.

Vermeulen Yew.....	6- 9-inch	2.80	5.00	11.50			

ROOTED CUTTINGS—On all above varieties, 4-8 inch, 10 for \$2.20, 25 for \$5.25, 50 for \$10.00.

Detroit, Mich., Sept. 3, 1946.
Girard Bros. Nursery, Geneva, Ohio.

Dear Sirs: I am ashamed that I have not written until this late date in appreciation of the order you sent me last spring. It was so perfectly packed that it arrived in

prime condition. I have never had an order arrive in better shape and feel that you deserve special praise for the size and vigor of the plants. I will gladly recommend your nursery to anyone. Thanking you again, I remain
Sincerely,
Mrs. Geo. Atkinson.

Grow Christmas Trees for Profit

In many sections, one of the most profitable ways to utilize unprofitable ground is to establish a plantation of cultivated Christmas trees. You can start by three methods: (1) growing trees from seed, (2) from seedlings, and (3) from transplants. The transplanted trees will advance your tree growths from 2 to 5 years. Cultivated trees command a better price than wild grown stock. There is a big demand in practically every city and town for nursery grown or cultivated Christmas trees. The trade is asking for them. Wild stock is brought in from such long distances that the trees shed needles before they are set up. In the last few years there has been a great demand for live trees as these trees can serve two purposes: (1) for decorating during the holiday

season and (2) later used for decorating lawns. Selling of Christmas trees can begin when trees are 12 to 15 inches in height. If trees are cultivated the first two years, returns begin within two or three years after the plantations are established. A spacing of 3 feet by 3 feet allows for 5600 trees per acre. A planting of 4 feet by 4 feet allows 2720 trees per acre.

The land should be plowed and prepared the same as for a field crop. Almost any soil of good texture will grow Conifers. Trees most suitable for this purpose are: Norway Spruce, White Spruce, Black Hill Spruce, Colorado Blue Spruce, Scotch Pine, Austrian Pine, American Red Pine, Balsam Fir and Douglas Fir.

Evergreens for Reforestation

Growing timber can be made an important source of farm revenues for idle land. With the scarcity of lumber as it is today, it will take many years before a normal amount of lumber can be had. Our lumber supply is dangerously low; our government urges that we utilize land for growing timber, which is also profitable.

But that is not all; reforestation is necessary to prevent floods and soil erosion. Timber is now being cut in greater quantities than ever before. A large quantity

of our timber went to war.

In some states, land planted to timber is tax free. Evergreen trees grow rapidly and yield crops of timber sooner than most deciduous trees.

The pines, in particular, take hold and thrive better than hard wood deciduous trees and do well in poor, sandy soil. If interested write to the United States Department of Agriculture, Washington, D. C., for Farmers' Bulletin No. 1453, Growing and Planting Conifer Trees on the Farm.

INTERMEDIA YEWE
(*Taxus cuspidata intermedia*)

HATFIELD YEWE
(*Taxus cuspidata hatfieldi*)

SCOTCH PINE
(*Pinus sylvestris*)

AUSTRIAN PINE
(*Pinus Nigra*)

WHITE PINE
(*Pinus strobus*)

THE PINE FAMILY (*Pinus*)

Pines are widely planted everywhere. All pines are hardy. Many of the species are valuable for wood, fuel, reforestation, windbreaks, soil erosion prevention. Mugho is the main dwarf ornamental species.

Banksiana (Jack) — Makes quick, dense windbreaks. Grows on poor soil. Picturesque tree. Native of the West.

Austrian (Nigra) — Sturdy, upright tree of compact symmetrical growth.

White Pine (Strobus)—Soft bluish-green needles. Fine timber species.

American Red or Norway—Deep green all year. Best of all Pines for timber and Christmas tree planting. Produces valuable wood for fuel. Grows fast.

Western Yellow Pine (*Pinus Ponderosa*). Symmetrical variety with long bluish-green needles. Best for ornamental and windbreak planting. Also, good timber variety. Very hardy.

	Size	25	100	500	1000
American Red Pine.....	4- 6 inch seedlings	\$1.30	\$ 4.25	\$20.00	\$32.00
American Red Pine.....	5- 8 inch transplants	3.00	10.00	40.00	70.00
American Red Pine.....	7-12 inch transplants	4.00	14.00	45.00	85.00
Austrian Pine.....	5- 7 inch seedlings	2.00	6.50	25.00	40.00
Jack Pine.....	6- 8 inch seedlings	1.30	4.25	20.00	32.00
Jack Pine.....	5- 8 inch transplants	3.00	10.00	40.00	70.00
Western Yellow Pine.....	4- 6 inch seedlings	1.30	4.25	20.00	32.00
Western Yellow Pine.....	5- 7 inch transplants	3.00	10.00	40.00	70.00
Western Yellow Pine.....	8-12 inch transplants	5.00	18.00	80.00	140.00
White Pine.....	2- 4 inch seedlings	1.25	4.00	17.00	30.00
White Pine.....	4- 6 inch transplants	3.00	10.00	40.00	70.00
White Pine.....	6-10 inch transplants	5.00	18.00	80.00	140.00

Note—250 at 500 rate; 750 at 1000 rate.

WINDBREAK PINES—SPECIAL

Transplanting 3 to 4 foot pine is quite a shock to the trees, as they do not have a root system like other evergreens. Young pines take hold easily and begin at once to grow rapidly. Young pines are far the best to plant. Transplanted once from seedling to field beds.

White Pine	12 to 16 inch
Norway (American Red)	18 to 24 inch
Scotch Pine	16 to 20 inch
Austrian Pine	12 to 18 inch

Price—10 for \$5.00, 25 for \$11.25, 50 for \$20.00, by express. Orders cannot be accepted for less than 5 trees of a kind. F.O.B. Geneva.

• ENGELMANN SPRUCE
(*Picea engelmanni*)

COLORADO BLUE SPRUCE
(*Picea pungens glauca*)

BLACK HILL SPRUCE
(*Picea canadensis albertiana*)

SPRUCE - (*Picea*)

Spruce are unsurpassed for their ornamental qualities. They are conical or pyramidal evergreens of great hardiness and usefulness. Widely used for ornamental, forestry and windbreak planting.

White Spruce—Makes a more dense Christmas tree than Norway and grows just as fast. Closely related to Black Hills. Fine also for windbreak and forestry planting.

Black Hills Spruce—Very compact, deep bluish-green foliage. Best Spruce for dry country planting. Also the best Spruce for planting in yards, as it stays small for many years and is highly ornamental. Often used in window boxes when young because of its early, dense, shapely habit. We know of no better table Christmas tree.

Engelmann Spruce—Steel blue foliage. Has slender pyramidal branches which form a dense, narrow pyramid. Rapid growing. Most valuable tree for forestry planting, background use, ornamental purposes. Its blue color comes in the winter and makes this tree command a premium price among Christmas buyers.

Norway Spruce—Norway has been more widely used for Christmas tree planting and for windbreaks than any other species. Norway in seedlings will be limited in supply for some time.

Colorado Blue Spruce—One of the handsomest native trees growing in the Rocky Mountains. Use this tree for background and individual specimen planting. Trees grow quite slowly when young, but when six or seven years old, after becoming established in a new planting, grow surprisingly fast. The fine blue color comes as the trees get older. Prefer heavy soil.

Black Spruce—A rapid growing tree, suitable for Christmas trees and dense forestry.

Koster Blue Spruce—Strictly ornamental, probably the most in demand of any spruce due to its spectacular color. Made by grafts only. Silvery blue.

Morheim Spruce—Another ornamental, a darker shade of blue than Koster. Makes a very fine specimen and in very much demand. Stock on these two is very scarce.

HICK'S YEW
(*Taxus media hicksi*)

KOSTER BLUE SPRUCE
(*Picea pungens kosteriana*)

WHITE SPRUCE
(*Picea glauca*)

NORWAY SPRUCE
(*Picea excelsa*)

DOUGLAS FIR
(*Pseudotsuga douglasi*)

SILVER FIR
(*Abies concolor*)

EUROPEAN LARCH

FIRS - (Abies)

Trees of Great Hardiness, Thriving in Almost Any Exposed Situation

BALSAM FIR

Best for shade, rich black-green needles. Fine for Christmas tree and forestry planting.

Seedlings—3-5 in., 25 for \$2.00, 100 for \$6.50, 500 for \$30.00. These are fine 3 year old seedlings.

Transplants—4-6 in., 4 years old, 25 for \$3.00, 100 for \$9.50, 500 for \$42.50.

Transplants—8-10 in., 5 years old, 25 for \$5.00, 100 for \$18.00, 500 for \$75.00.

COLORADO SILVER FIR

Finest of the Rocky Mountain evergreens. Most valuable for Christmas tree, forestry and ornamental use. A very beautiful tree.

Seedlings—6-8 in., 25 for \$3.00, 100 for \$11.00, 500 for \$50.00.

BLUE DOUGLAS FIR

Soft blue color, graceful branches. Adapted for trimming. Unexcelled for all purposes.

Seedlings—6-8 in., 25 for \$3.00, 100 for \$11.00, 500 for \$50.00.

Transplants—5 years old, 6-9 in., 25 for \$4.50, 100 for \$16.00. We will quote on larger fir specimens if desired.

Loveland, Ohio, Nov. 15, 1946.

Girard Bros. Nursery, Geneva, Ohio.

Gentlemen: Your shipment received in beautiful condition. Thanks again for the fine stock. It was a pleasure to plant them.

Sincerely yours,
Dolly M. Ernst, Enyart Rd.

Parker "Yardgroom" Lawnsweeper
for lasting lawn beauty.

Gently sweeps up leaves, twigs, grass cuttings, paper and weed seeds. Ends drudgery and grass damage of antiquated raking. Grass healthier—sun and moisture get right down to the roots. Will do 4 hours' work in 1 hour. \$34.00 F.O.B. Springfield, Ohio.

Parker "Springfield" Lawnsweeper
for a well groomed lawn.

A labor saver that will do 6 hours' work in 1 hour. Gently sweeps up debris of all light character, ending drudgery and grass damage of raking. See this new labor saving lawn equipment today. \$44.00 F.O.B. Springfield, Ohio.

MUGHO PINES ALONG AN ENTRANCE WALK

CANADA HEMLOCK
(*Tsuga canadensis*)

Mugho Compacta Pine

Girard Bros.' Mugho Pine is grown from a selected strain of seed which produces the true, many stemmed, low branched, dwarf type. The color is a deep green, summer and winter. Mugho seldom grows over 4 to 5 feet tall even if never pruned, but spreads out. If sheared annually it can be kept as small as desired. Shearing produces a thick, dense foliage, as thick and as green as a bluegrass lawn. Mugho does well in shade growing on the north side, or shady side, of a building without getting ragged. Without question, it is the outstanding dwarf evergreen for all-around use. In the spring when the new needles come, they are beautiful. Especially adapted for planting in front of taller evergreens, entrances to walks, low informal hedges, and on terraces.

Mugho Pine Transplants — 6 to 8 inches, 10 for \$3.00; 25 for \$7.00; 100 for \$25.00.

Young Mughos to Plant in Your Garden

Line these out 18 inches apart and they will soon develop into little trees. In about one year you will have trees 8x8 inch size. Often they should be pruned back before you set them out. This pruning can be done then or later. If flat specimens are wanted, prune low. In shipping orders we often prune one tree for a sample and mark it.

For Specimen Planting	Each	4 for
About 8x8 inch spread.....	\$1.00	\$3.50
About 10x10 inch spread.....	1.50	5.25
About 12x12 inch spread.....	2.00	7.00
About 14x14 inch spread.....	2.75	10.00
About 18x18 inch spread.....	3.00	11.00

Balled in earth and peat, packed in waterproof kraft. F.O.B. Geneva.

Note—These are real bargain prices on Mughos. If you doubt it, consult other catalogues. Our Mughos are as good as any grown anywhere. Seedlings not available.

Young Canadian Hemlock Trees

Most graceful of all evergreens is the title often bestowed on the Hemlock. Its long branches droop gracefully to the ground. Needles are soft and delicate. Does well in full sun or half shade, but prefers a rather moist place, a little sheltered from sweeping winds and partial shade. We secure our Hemlock seed from the far North securing a hardy, superior type. Do not confuse our Canadian Hemlock with the Hemlock species found growing wild in Tennessee.

Seedlings—3-8 inch, 10 for \$1.30, 25 for \$2.50, 100 for \$8.50, 1000 for \$80.00.

Transplants—4-8 inch, 10 for \$2.00, 25 for \$3.75, 100 for \$14.00, 1000 for \$120.00.

Sheared Specimens—24-36 inch, BB, \$4.50 each, 10 for \$40.00.

Alligator No. 101 Pruning Shears

For home gardens, orange groves, orchards, vineyards, farms and nurseries. Long and narrow easy feel hand grip for hard to get at places. Safe operating—springs are hidden, safety locked when not in use. Hardened and tempered cutting blade leaves clean perfect cut. Light weight, only 14 oz. The ladies will prefer the Alligator Shears for ease of operation. Price \$1.75 each.

PFITZER JUNIPER
(*Juniperus chinensis pfitzeriana*)

SAVIN JUNIPER
(*Juniperus sabina*)

THE JUNIPER FAMILY

The Juniper family is ornamental. The upright forms make beautiful specimens, and the lower growing varieties are used for ground covers. Junipers are mostly propagated from cuttings and some of the rarer forms by grafting.

SAVIN — Spreading, vase-like, about 2 feet high. Makes fine specimens.

Transplants—4-6 in. These are 5 year old plants ready to grow into fine specimens. 10 for \$2.25, 25 for \$5.25, 100 for \$19.00.

Specimens—18-24 in. BB, \$3.00 each.

ANDORRA—Low spreading habit, summer foliage, silvery cast; after frost, purple.

Transplants—6-10 in., 10 for \$4.20, 50 for \$20.00.

Transplants—10-12 in., 10 for \$5.00, 25 for \$12.00.

Specimen—18-24 in. BB, \$3.00 each.

PFITZER—Low growing, spreading, picturesque.

Rooted Cuttings—10 for \$2.00, 50 for \$9.75.

Transplants—6-10 in., 10 for \$4.50, 50 for \$21.00.

Transplants—10-12 in., 10 for \$6.00, 25 for \$14.50.

Specimens—BB, 18-24 in., \$3.25 each.

Extra Fancy BB., 2-3 ft., \$6.50 each.

JUNIPERUS CHINENSIS SARGENTI

(Sargent Juniper). One of the most beautiful low growing evergreens introduced. Native of China; acclimated to our country. Bluish color; good grower. Mostly propagated by grafting, but we have perfected a method whereas they can be rooted much cheaper. Suitable for hillside and foundation planting.

Rooted Cuttings—25c each.

Specimens—2-3 ft., BB., \$4.50 each.

ANDORRA JUNIPER

SPINY GREEK JUNIPER
(*Juniperus excelsa stricta*)

REDCEDAR
(*Juniperus virginiana*)

IRISH JUNIPER
(*Juniperus communis hibernica*)

JUNIPERUS HORIZONTALIS DOUGLASI

(Creeping Waukegan Juniper). Ideal for terraces, borders and rock gardens.

Transplants—10-14 in., 10 for \$5.00, 50 for \$20.00.

Specimen—18-24 in., BB., \$3.00.

JUNIPERUS HORIZONTALIS GLAUCA

(Blue Creeping Juniper). Very attractive on sloping lawns, terraces, overhanging walls and the like, where they can be used.

Transplants—6-8 in., 10 for \$4.20.

Specimens—2-3 ft., BB., \$4.00 each.

Rooted Cuttings — 10 for \$2.00, 50 for \$9.75, 100 for \$16.00.

JUNIPERUS COMMUNIS HIBERNICA FASTIGATA

(Narrow Irish Juniper). A form very superior to the common Irish Juniper. Grows into a dense narrow column. A healthy, vigorous grower.

Rooted Cuttings—5-8 in., 10 for \$2.25, 50 for \$11.00, 100 for \$20.00.

Transplants—8-10 in., 10 for \$4.00, 25 for \$9.00.

Transplants—10-14 in., 5 for \$3.75.

Specimens—2-3 ft., BB., \$2.85 each; 3-4 ft., BB., \$3.25 each.

JUNIPERUS EXCELSA STRICTA

(Spiny Greek Juniper). Grows very dense, symmetrical, especially adapted to urns, tubs, rock gardens. Dwarf cone shaped, grayish green foliage all year.

Rooted Cuttings—4-6 in., 10 for \$2.25, 50 for \$11.00, 100 for \$20.00.

Transplants—5-8 in., 10 for \$4.00, 25 for \$9.00.

Specimens—2-3 ft., BB., \$4.50.

JUNIPERUS SQUAMATA MEYERI

(Meyer's Juniper). This possesses a most unusual color. Leaves are heavy, pointed. Foliage takes on different colors—green, white, pinkish-red, and blue.

Specimens—2-3 ft., BB., \$5.00 each.

JUNIPERUS VIRGINIANA

(Redcedar). This is the mother plant from which numerous horticultural varieties have been developed over many years. Several varieties offered in this catalog are horticultural forms of Redcedar.

Seedlings—6-8 in., 25 for \$3.00.

Specimens—2-3 ft., BB., \$3.50 each.

JUNIPERUS VIRGINIANA BURKI

(Burk Juniper). A horticultural variety of the Redcedar resembling the *Juniperus virginiana glauca*. The color is somewhat deeper blue. The tree seems to take on a more compact habit than the *Glauca*.

Grafts—8-10 in., 75c each, 10 for \$7.00.

Specimens—2-3 ft., BB., \$4.90 each.

JUNIPERUS VIRGINIANA CANAERTI

(Canaert Juniper). This horticultural variety of Redcedar has long been one of the leading favorites. It grows in a symmetrical, pyramidal shape, well covered with heavy green foliage.

Grafts—8-10 in., 75c each, 10 for \$7.00.

Transplants—10-12 in., \$1.25 each.

Specimens—3-4 ft., BB., \$4.90.

JUNIPERUS CHINENSIS COLUMNARIS

(Blue Columnar Chinese Juniper). One of the best known of the horticultural varieties of the Chinese Junipers. Can be grown into a pyramid or narrow column shape, attractive *Glaucas*, blue color.

Grafts—8-10 in., 75c each, 10 for \$7.00.

Specimens—2-3 ft., BB., \$4.90 each.

JUNIPERUS CHINENSIS KETELEERI

(Keteleer Juniper). This tree has a good rich green color, is a good grower, and has an abundance of berries.

Grafts—8-10 in., 75c each, 10 for \$7.00.

Specimen—2-3 ft., BB., \$4.90 each.

Note—All Balled and Burlapped specimens, F.O.B. Geneva.

JUNIPERUS VIRGINIANA GLAUCA

(Silver Cedar). This is a favorite with many customers. It is a shapely, pyramidal tree of moderate size. Outstanding silvery-blue. Brightest in early spring, darkening to a deep blue as season progresses. Trims well.

Specimens—2-3 ft., BB., \$5.00 each.

THREAD CYPRESS

CYPRESS (Chamaecyparis)

Strictly ornamental species, graceful branches, all easily trimmed, all hardy and good landscape varieties.

THREAD CYPRESS

(Filifera, green). Slender olive green foliage, makes a broad low bush. Especially useful around corners of low houses.

Rooted Cuttings — 6-8 in., 10 for \$2.00, 100 for \$18.00.

Transplants—6-9 in., 10 for \$3.75, 25 for \$8.75.

Specimens—18-24 in., BB., \$3.25.

THREAD CYPRESS

(Filifera golden). Same as Filifera green, only a beautiful golden yellow, a valuable ornamental.

Rooted Cuttings—5-7 in., 10 for \$2.50, 25 for \$6.00.

Specimens—18-24 in., \$4.50 each.

ILEX GLABRA

SILVER MOSS CYPRESS

Same type and growth of fine feathery foliage as Green and Golden Plume, except color, which is silver. One of the very finest of all silvery evergreens and perfectly hardy everywhere, even in Canada. Prefers sun.

Rooted Cuttings—10 for \$2.25.

Transplants—6-8 inch., 10 for \$5.00.

Specimens—2-3 ft., BB., \$4.50 each.

GREEN PLUME CYPRESS

Feathery, fern-like, deep green foliage. The more it is pruned, the more beautiful it becomes. We trim it mostly into dense round balls.

Rooted Cuttings—4-7 in., 10 for \$2.00, 25 for \$4.50, 100 for \$16.00.

Transplants—4-6 in., 10 for \$3.50, 25 for \$7.50.

Transplants—9-12 in., 10 for \$4.50, 25 for \$10.00.

Specimens—18-24 in., BB., \$3.00 each.

GOLDEN PLUME CYPRESS

Same type of foliage as Green Plume, except it is a bright golden yellow. Unexcelled for low, dense hedges, individual specimens, or foundation planting in full sun.

Rooted Cuttings—4-7 in., 10 for \$2.00, 25 for \$4.50, 100 for \$16.00.

Transplants—4-6 in., 10 for \$3.50, 25 for \$7.50.

Transplants—9-12 in., 10 for \$4.50, 25 for \$10.00.

Specimens—18-24 in., BB., \$3.00 each.

ILEX CONVEXA

Note—All Balled and Burlapped specimens, F.O.B. Geneva.

AMERICAN ARBORVITAE
(*Thuja occidentalis*)

WOODWARD ARBORVITAE
(*Thuja occidentalis woodwardi*)

PYRAMIDAL ARBORVITAE
(*Thuja occidentalis pyramidalis*)

ARBORVITAE

THUJA OCCIDENTALIS

(American Arborvitae). We grow only from seed, the Northern form from Canada. Grows in compact form, pyramidal in shape. Thrives on vigorous pruning, makes fine low hedges or taller windbreaks.

Transplants—4-7 in., 25 for \$2.60, 100 for \$8.00, 500 for \$35.00.

Transplants—10-14 in., 10 for \$4.00.

Specimen—3-4 in., BB., \$3.50 each.

THUJA ORIENTALIS

(Chinese Arborvitae). A beautiful pyramidal growing type of evergreen. Grows very compact; can be sheared easily. Suitable for ornamental planting.

Seedlings—4-6 inch., 10 for \$2.00; 100 for \$18.00.

THUJA OCCIDENTALIS PYRAMIDALIS

(Pyramidal Arborvitae). Tall, slender form of American Arborvitae. Always prune trees while young to build the slender form.

Rooted Cuttings—10 for \$1.90, 25 for \$4.25.

Transplants—5-7 in., 10 for \$3.00, 25 for \$7.00.

Specimens—3-4 ft., BB., \$3.85 each.

THUJA COMPACTA

Another good globe type somewhat similar to Woodwardi, but much greener and thicker foliage.

Rooted Cuttings—10 for \$2.00, 25 for \$4.60.

Specimens—18 in., BB., \$3.25 each.

THUJA ELLWANGERIANA

A slow growing pyramid type, juvenile foliage is very fine and feathery like, makes a beautiful tree.

Transplants—9-12 in., 10 for \$4.00, 25 for \$9.50.

Specimens—2-3 ft., BB., \$3.75.

THUJA LUTEA

(George Peabody). A beautiful golden type color very pronounced, makes a very good ornamental. This variety is always scarce.

Cuttings—6-8 in., 10 for \$2.00, 25 for \$4.60.

Specimens—2-3 ft., BB., \$4.85 each.

THUJA OCCIDENTALIS WOODWARDI

(Woodward Globe Arborvitae). Grows naturally round like a ball and forms a bushy, natural globe shaped tree of very compact form and good color. The best globe shaped evergreen. Small trees show up well in window boxes.

Rooted Cuttings—10 for \$1.90, 25 for \$4.25.

Transplants—4-7 in., 10 for \$4.00, 25 for \$9.50.

Transplants—Strong 2 year field grown, 10 for \$7.00.

Specimens—18 in. dia., BB., \$3.00.

BROAD LEAF EVERGREENS

ABELIA GRANDI (Glossy Abelia)

Beautiful hardy evergreen shrub for foundation and mass planting. Foliage glossy green, carrying masses of white flowers with pink blush all summer and fall. In the south it stays green all winter, here in Ohio it loses its leaves in late winter. Seldom grows over 2 feet high. Easily kept in bounds by pruning. Grows well in semi-shade or full sun. Easy shrub to transplant. At its best in late summer and fall.

Field Transplants—8-15 in., 45c each; 3 for \$1.30; 12 for \$4.00; 18-24 in., \$1.35 each.

AZALEA CALENDULACIA

Light salmon to deep golden yellow. This one does best in part shade; needs acid soil, best obtained by peat humus or oak leaves.

Transplants—6-12 in., 50c each, 10 for \$4.00; 12-18 in., BB., \$3.25 each.

AZALEA KAEMPFERI

Also known as Torch Azalea. Showy salmon red. Requires acid soil. Will grow to a height of 7 feet. Plants covered with flowers from May to June.

Transplants—6-12 in., 50c each, 10 for \$4.00; 12-18 in., BB., \$3.25 each.

AZALEA MOLLIS

Yellow to red blooms; height 2-3 feet. This is one of the easiest to grow. Makes the largest blooms of any; very striking colors.

Transplants—6-12 in., 50c each, 10 for \$4.00. 12-18 in., BB., \$3.25 each.

AZALEA SCHLIPPENBACHI

Known as Royal Azalea. Beautiful clear pink blooms on a plant that reaches 9 feet when fully matured; easy to grow and very hardy. Requires acid soil.

Transplants—15-18 in., BB., \$3.80 each; 2-3 ft., BB., \$4.75 each.

All balled and burlapped specimens F.O.B. Geneva.

AZALEA MUCRONULATUM

Also called Indica Alba. Beautiful white blossoms on a bushy plant which grows to a height of 5½ feet; requires acid soil. Blooms in late May.

Transplants—6-12 in., 50c each, 10 for \$4.00; 18-24 in., BB., \$3.50 each.

AZALEA SHERWOODI (Sherwood Orchid Azalea)

A hybrid hinodegiri with flowers of a clear lavender with speckled throat. Flowers are large and completely cover the plant. Good to plant in masses as they harmonize with other colors in gardens. This is a new azalea introduced recently from the Pacific coast. Hardier than Hinodegiri.

Potted Plants—6-8 in., 50c each.

BUXUS SUFFRUTICOSA (Dwarf English Boxwood)

Dwarf and slow growing. Best known evergreen edging plant. Foliage deep green and dense. Large specimens often used in urns and porch boxes.

Field Grown Transplants—6-8 in., 4 for \$2.00, 10 for \$4.50.

DAPHNE CNEORUM (Garland Flower)

One of the very choicest of all rock garden evergreens. Produces delicate rose-pink clusters of flowers completely covering the plant in early spring and more sparsely at intervals all summer until freezing weather. Flowers rival the carnation for fragrance. Growth not exceeding 8-10 inches in height, but spreading out making a mat of grey green. Requires sunny position. Young rooted field grown plants, often in bloom.

Transplants—4-6 in., 50c each, 4 for \$1.85. 4-6 in., potted, 40c each, 4 for \$1.50.

Rooted Cuttings—10 for \$1.80.

DROOPING LEUCOTHOE (Leucothoe Catesbaei)

A very ornamental broad leaved evergreen with large, glossy foliage. Foliage turns to beautiful shades of red and bronze in the fall and winter. It produces clusters of white flowers in the spring. Drooping branches make it a good facer or under-cover plant for taller shrubs. Semi-dwarf and hardy.

Transplants—10-14 in., 75c each, 3 for \$2.10.

EUONYMUS

Coloratus. (Purple Leaf Creeping Euonymus). A purple leaf form of *E. Radicans*. This plant carries a rich green color throughout the summer and in the autumn turns to a purplish-red color which remains with it until spring. A wonderful plant for mass planting on banks and on stone-work. 15-18 in. 75c each.

Patens. (Sieboldi). A spreading evergreen shrub with bright green foliage which carries the rich green color throughout the year. Best used in group planting and is an ideal plant for border work. 15-18 in., \$1.00 each, 18-24 in., \$1.25 each.

Vegetus. (Big Leaf Wintercreeper). Bushy with round dull green leaves. This plant is a beautiful sight in winter when it is covered with its bright scarlet fruit. 15-18 in., \$1.50 each; 18-24 in., \$2.00 each.

ILEX CONVEXA

A slow growing evergreen with small, glossy, cup-shaped foliage. Useful where small shrubs are necessary. Can be sheared into dense globe or will do well without shearing. Very hardy.

Transplants—6-8 in., 55c each, 3 for \$1.50.

ILEX CRENATA (Oriental Holly)

A low-growing shrub with small, smooth, dark green leaves, resembling boxwood. Grows very dense with many small branchlets and black berries. Very useful for ornamental planting; makes an artistic hedge. Can be trimmed in any shape desired.

Transplants—4-6 in., 35c each, 8-10 in., 55c each, 3 for \$1.50.

Rooted Cuttings—3-5 in., 10 for \$1.80.

ILEX CRENATA BULLATA

Similar to above variety in all ways with exception that it grows in pyramidal form. Useful in landscape work or group planting. Has abundance of black, pea-sized berries.

Rooted Cuttings—3-5 in., 10 for \$1.80.

ILEX GLABRA

A low growing shrub which serves same purpose as *Ilex Crenata*. Has larger, lighter green foliage than above varieties. This variety sometimes known as Inkberry, as it is covered with blue-black berries in the fall of the year. Very hardy and easy to grow. Will stand shearing well.

Transplants—8-10 in., 55c each, 3 for \$1.50.

Rooted Cuttings—3-5 in., 10 for \$1.80.

ILEX OPACA (American Holly)

Seedling American Holly cannot be depended upon to bear fruit, because there are both male and female plants. Our plants are grown from cuttings from bearing female plants. These cost more than seedlings and Hollies dug from the wild. They do

best in a moist, partially shaded, wind protected spot.

Cutting Grown Transplants—10-16 in., 3 for \$2.50, 12 for \$7.50.

KAL. LATIFOLIA (Mountain Laurel)

Native of the Appalachian Mountains. Grows into a compact, symmetrical shrub, densely covered with foliage. Leaves medium sized, glossy and unchanging throughout the year. When in bloom the plants are literally bouquets of lovely cup-shaped flowers ranging from almost white to deep pink in color on individual specimens. Effective singly or in mass plantings. Very hardy and desirable. Requires damp, loose, acid soil, humus, considerable shade. Easily the finest flowering evergreen grown.

Transplants—8-10 in., 50c each, 10 for \$4.00; 12-15 in., BB., \$3.25.

MAHONIA AQUIFOLIA

(Oregon Holly Grape)

The leaves are holly-like and bright green. Has long clusters of bright golden yellow flowers in the spring, followed by bunches of bright blue grape-like berries. Most attractive in foliage, flower and fruit. The sprays are fine for interior decoration. In the north the leaves lose their color in late winter but do not fall off. In the spring new life comes back into these leaves. Never winter kills. At its best in group plantings. We grow it in full sun, but it is at its best in half shade. Prefers a rather heavy soil.

Transplants—Field grown 10-12 in., 75c each, 3 for \$2.10, 12 for \$6.00.

RHODODENDRON HYBRIDS

A broad leaved evergreen with large showy flowers in shades of white, red and pink. These plants are obtained by crossing large and free flowering varieties of selected hybrids.

Grafts—8-10 in., \$1.40 each, 3 for \$4.00.

RHODODENDRON MAXIMUM

(Rosebay Rhododendron)

Evergreen shrub with large showy leaves and bluish-white flowers in July. This plant requires an acid soil, humus, damp loose culture, as the roots feed at the surface, so do not hoe around them. Does well under Oak, Cherry, and Birch trees, but avoid Beech and Maple. To get the required acid condition on lime or sweet soils use a quantity of peat around the roots when planting, or plant all in peat. This is a wonderful shrub for mass effects.

Transplants—8-10 in., 75c each, 10 for \$7.00; 18-24 in., BB., \$3.65 each; 2-3 ft., BB., \$4.85 each.

Japanese Pachysandra as a border

Pachysandra terminalis (Japanese Pachysandra)

JAPANESE PACHYSANDRA

(*Pachysandra terminalis*)

For ground cover or for grass under trees. If you have a sandy bank, a terrace, places under trees where grass will not grow, a low border to fill in, plant Spurge. This is the ideal evergreen ground cover. Hardy everywhere in sun or shade. Same attractive green color all winter. Splendid plant for window boxes. 2¼ in. pot plant size, 4-6 in., 19c each, 10 for \$1.80, 100 for \$16.00.

VINCA MINOR

(Periwinkle or Trailing Myrtle)

Hardy evergreen trailing herb. Makes a dense, attractive ground cover, and thrives with practically no care. Even does well on dry sand banks. A most suitable plant to grow as edgings to shrubbery borders, carpet the ground under the shade of trees or in shady borders. Hugs the ground.

Strong 3 year old field grown clumps, 5 to 8 runners, 10 for \$1.20, 100 for \$9.00.

PRIVETS

Ligustrum Amurense. (Amur River Privet). A hardy northern group type, upright and tall growing, the leaves a good dark green. Makes an ideal hedge. 12-18 in., 2-3 cains, 20c each, 100 for \$18.00.

Ligustrum Ibota. A strong growing spreading shrub with small white flowers in June followed by a heavy crop of black berries which hang on well into the winter. This variety is widely used for wide hedges and for group plantings. 2-3 ft., 35c each; 100 for \$25.00.

Ligustrum Ovalifolium. (California Privet). Quick growing, dense, straight, well clothed shoots. A dark shiny green, most used where hardy. 18-24 in., 2-3 cains, 20c each, 100 for \$18.00.

Ligustrum Regalianum. (Regal's Privet). Strong, very hardy type, with dark shiny leaves. The branches are stiff and horizontally spreading gracefully, drooping at the ends. All plants of this variety are grown from softwood cuttings and therefore are very uniform in type. 18-24 in., 50c each, 100 for \$40.00.

BERBERIS (Barberry)

Thunbergii (Japanese Barberry). 5 feet. Very tolerant. Bushy and dense, red berry in autumn. Fine hedge. The most valuable, useful shrub in cultivation. 10-18 in., 45c each, 10 for \$4.00.

HARDY PERENNIAL PHLOX

PHLOX

No garden is complete without perennial Phlox. The color range is so large, the colors so bright, blooming period so long, every flower garden should find a place for some. Plants begin to bloom in late June. With proper treatment, continuous blooms may be expected until frost. Our list of Phlox is made up of the very best of standard sorts and includes some of the new varieties. These are all heavy one year field grown clumps guaranteed to bloom this year.

Prime Minister—Pure white, with vermillion red eye.

Von Lassburg—One of the most colorful, sturdy growing white phlox.

Mary Louise—Pure, glistening snow white heads of very large size.

Daily Sketch — Brilliant salmon pink, crimson eye.

Annie Laurie — Beautiful salmon, large trusses.

Salmon Glow—Flame pink with salmon.

Lillian—Exquisite cameo pink.

July Lights—Brilliant carmine red, with blood red eye.

Frau Alfred Vonmautner—Large, salmon orange flowers with small crimson eye.

R. P. Struthers—Rosy red, scarlet eye.

Flash—New large, rosy red, one of the finest phlox.

Fuerbrand—Flaming orange scarlet, tinted with carmine.

William Kesselring—Plum purple shading to dainty lilac eye.

Royal Purple—Rich shaded violet with deeper eye.

Caroline Vandenburg—Lilac blue, large flowerets.

Price, varieties listed above, 5 for \$1.40, 10 for \$2.75.

Special Collection—1 each of the above varieties, \$4.00.

NEW VARIETIES

Harvest Fire — Brilliant salmon orange. Very large heads. Extremely heavy, healthy foliage.

Sweetheart—Deep salmon pink. A beauty.

San Antonio—Vivid and brilliant flaming carmine heads, shaded plum red.

Eva Forrester—Rich salmon pink, white eye.

Leo Schlageter—Most fiery red of all phlox.

Bright Eyes—New bright rose pink, dark red eye.

Blue Boy—Bluest of all phlox.

Price, new varieties, 5 for \$1.60, 10 for \$3.00.

Special Collection—1 each of the 7 varieties above, \$1.50.

NEW ENGLISH CHRYSANTHEMUMS

These Chrysanthemums from England were introduced in this country a few years ago. They are being improved yearly. We are receiving new varieties as fast as they are introduced, and we are listing only the best of these. Most of them resemble greenhouse chrysanthemums. They are all hardy in any part of the United States and Canada. If you want the best in chrysanthemums, try these.

Alabaster—A very early, large white, with flowers 5 in. across.

Alpink—A deep rose pink.

Border White—Early large white.

Buttercup—Large golden yellow.

Bronze Buttercup—Rich deep bronze with golden buff reverse.

Bronze Freda—Lovely bronze salmon, good for cutting.

Belle Mauve—Beautiful stiff stemmed silvery pink.

Coppelia—Bright Indian red, unusual, does not fade.

Cerise—Bright rosy cerise, lovely spray variety.

Conqueror—Large rich crimson.

China Gold—Bright golden bronze, quilled petals, grows tall.

Calumet—Large incurved yellow. Exhibition variety.

Daily Express—Bright orange chestnut, early variety.

Dorothy McGuire—Soft bronze with pointed petals.

Golden Dome—Golden yellow slightly overlaid orange bronze.

Gold Standard—Early variety, deep yellow, does not fade.

Gold Mine—Large golden orange flowers with fine centers.

Indiana—Lovely color-rich velvety crimson shading, darker toward center.

Hoopoe—A beautiful old rose.

Maryland Dome—Early variety, yellow slightly tinted bronze.

Mrs. Milner—Very large new white.

Mrs. T. Guthrie—Broad chestnut petals with bronze reverse, very large.

Mrs. Don McIvor—Exhibition flower of clear golden yellow.

Mrs. D. S. Orr—Extra large reddish-crimson blooms with gold reverse.

Mrs. T. Riley—Really lovely white with broad petals.

Orange Glow—Gold reverse on orange bronze, early variety.

Orange Queen—The richest golden yellow chrysanthemum.

Snowball—Free flowering ball shaped, early.

Salmon Freda—Beautiful salmon sport of pink Freda.

Sandy Richie—Very rich crimson color with gold reverse.

Sybil—Medium-sized flowers of good foliage, lovely flesh pink.

Tiger—Will be red, bronze and yellow according to age.

Una—Fine large pink with silvery reverse, blooms late.

From 2¼ in. pots, 35c each; 4 for \$1.25; 10 for \$3.00.

CHRYSANTHEMUMS—BUTTONS

Irene—Lovely pure white button.

Ruby Pompom—Profuse blooming, ruby crimson button.

Sonny Boy—Light golden bronze, early button.

Sept. Bronze—Button of mingling bronze shades.

From 2¼ in. pots, 25c each; 4 for 90c; 10 for \$2.25.

GLADIOLUS

We believe that gladiolus are among the best for cut flower purposes. They make up easily into bouquets which last for many days. Most florists are lost when the gladiolus season is over, as their best arrangements are generally made with these flowers. They require very little room — the smallest of gardens can hold 100 bulbs. Gladiolus do best in full sun and plenty of moisture with good drainage. Spray if there is any possibility of trips. They require some fertility, but will do well without it providing there is plenty of moisture.

Only the very best varieties for both commercial and exhibition purposes are listed. A planting circular on gladiolus will be sent with every order.

Algonquin—Early. Finest brilliant glowing scarlet. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Beacon — Mid-season. Clear bright rose scarlet with cream blotch. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Blessed Damosel—Mid-season. Wonderful glowing pink. One for 45c; 10 for \$3.50. Bulblets, 100 for \$2.00.

Burma—Mid-season. Deep rose shading, heavily ruffled. New. One for 40c; 10 for \$3.00. Bulblets, 100 for \$2.50.

Camellia—Mid-season. Blush white tinted pink with pinkish feather. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Chamouny—Mid-season. Distinct shade of cerise rose with a silver edge on all petals. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Corona—Mid-season. Creamy white shading more creamy toward the throat with a rose picotee edge on all petals. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Damaris—Mid-season. Clear purplish red or burgundy. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Early Rose—Early. Medium rose shading to darker rose. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Elizabeth the Queen—Mid-season. Beautiful clear mauve with darker lines in the throat. Two for 35c; 10 for \$1.40. Bulblets, 100 for \$1.50.

King Lear—Very early. Clear deep reddish purple with silver line on edge of all petals. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Laddie—Mid-season. Light pink, a rosy soft rose feather. Two for 20c; 10 for 90c. shade. Two for 20c; 10 for 90c. Bulblets, Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00. 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Lady Jane—Mid-season. Clear cream yellow with yellow lip petals which give the flower the appearance of yellow. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Lancaster—Mid-season. Clear dark purple with no markings. One for \$1.00; 10 for \$7.00. Bulblets, 10 for \$2.00.

Lantana—Early. Orange shading through orange salmon to a golden throat. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Lavender and Gold—Very early. Fresh clean light lavender blending to a clear yellow throat. Two for 35c; 10 for \$1.40. Bulblets, 100 for \$1.50.

Lavender Ruffles—Early. Pinkish lavender of a clear clean shade, slightly ruffled. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Leading Lady—Mid-season. A cream white sport of Picardy which is like its parent except for color. Two for 75c; 10 for \$2.75. Bulblets, 100 for \$2.50.

Legend — Mid-season. Light pure pink blending to a rich ivory white throat. Two for 45c; 10 for \$1.75. Bulblets, 100 for \$2.00.

Margaret Beaton—Early mid-season. Pure snow white with small orange-scarlet blotch in the throat. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Myrna—Early mid-season. Heavily ruffled ivory white. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Ogarita—Mid-season. Nice shade of rose salmon shading to a golden throat. Two for 30c; 10 for \$1.10. Bulblets, 100 for 50c.

Picardy—Mid-season. Clear soft salmon with flesh throat on which there is a small

Recado—Late mid-season. Rosy ash flecked and splashed with orange scarlet with a diffused darker blotch. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Red Charm—Early mid-season. Medium shade of red. Two for 25c; 10 for \$1.50. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Regent—Late mid-season. Clear glowing scarlet with a darker blotch. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Rocket—Mid-season. Most vivid, gorgeous scarlet. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Rosa Van Lima—Early mid-season. Light rose with a few darker lines in the throat. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Snowbank—Mid-season. Beautiful ruffled white with light creamy throat. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Snow Princess—Mid-season. A very nice white. Two for 20c; 10 for 90c. Bulblets, 100 for 25c; 1 pt. for \$2.75; 1 qt. for \$5.00.

Spotlight—Early mid-season. Clear medium deep yellow with small scarlet blotch. One for \$1.00; 10 for \$7.00. Bulblets, 10 for \$2.00.

Note—Approximately 2,000 bulblets to 1 pt.; 3,000 to 4,000 to 1 qt.

SPECIAL MIXTURE OF GLADIOLUS

100 large size bulbs made up of 25 leading varieties listed above. 100 for \$4.50.

Mixture of 25 varieties in bulblets, 100 for \$2.50.

Flowering Shrubs

ALTHEA HIBISCUS

(Rose of Sharon)

These are beautiful upright growing shrubs that sometimes attain the height of 20 feet. Generally bloom early in the spring. Very attractive with flowers from white to red. All listed are double varieties.

Anemoneaflores—Double Rose.

Ardens—Double Violet.

Boule de Feu—Double Red.

Jeanne d'Arc—Double Pure White.

Pulcherimus—Double Pink.

12-18 in., 25c each, 10 for \$2.00.

CORNUS FLORIDA RUBRA

(Pink Flowering Dogwood)

This is a grafted tree. The flowers are a beautiful shade of pink. Does well in shade. The tree blossoms profusely when 3 feet tall. This is a richly colored and very beautiful tree for any yard.

Heavy 2-3 ft. size, \$2.50 each.

FLORIDA PLENA

(Double Flowering Dogwood)

One of the showiest of the Dogwoods, this double flowering variety blooms freely about ten days later than the common white. The flowers are larger and double. Trees bloom at a younger age than the common white or pink dogwoods.

Heavy 2-3 ft. size, \$2.50 each.

DOUBLE FLOWERING PEACHES

These beautiful Double Flowering Peaches are far more hardy and showy than Japanese Flowering Cherries, even surpassing the very best varieties of Flowering Crabs. They cost less than either. They bloom younger and are far more reliable and satisfactory than Cherries or Crabs.

Double White Flowering — Large petals, fully doubled.

Double Flowering Pink — Blooms fully doubled, of clean, pure pink.

Double Flowering Red—An early bloomer, flowers of a bright, deep red.

Transplants—18-24 in., 75c each, 3 for \$2.10.

HYDRANGEA BLUEBOY

HYDRANGEA BLUEBOY

This beautiful variety is very hardy and produces masses of large, round clusters of flowers 8 to 10 inches in diameter. If soil conditions are right, these plants will produce beautiful blue flowers. In order to achieve this color they must be in acid soil. Grows into a bush form, and will reach a height of 3 or 4 feet. Foliage is thick and a very nice green. The blooms sometimes show pink and blue at the same time.

Potted, 2¼ in., 25c each.

Transplants, 5-7 in., 55c each, 3 for \$1.50.

AMERICAN BITTERSWEET

Native vine popular for the berries. Grows anywhere in sun or shade. Only female plants bear the red berries. Our plants are grown from cuttings from fruiting female vines. These cost more than seedlings to grow. The customer has everything to gain by planting bearing vines. 3 yr. plants 75c each, 3 for \$2.00, 6 for \$5.50.

Deciduous Tree Seedlings for Reforestation, Etc.

Mix deciduous trees with evergreens in reforestation planting. Plant these trees for shade, timber, fuel, to help feed springs, to stop soil erosion, to provide homes for birds and wild life.

How to Plant Seedlings

If your ground is suitable use a plow; open a deep furrow. If not possible to use a plow, then stake your ground off in rows and set with a digging hoe. Be sure the roots have ample depth. Pack the soil with foot about the roots in order to close up air pockets. When your trees arrive they will be in bundles. Open a trench and place the roots in the trench and fill dirt about the roots. In case the weather is bad you can keep the plants in good condition.

Table Showing Number of Trees per Acre

4x4 ft. apart...	2,700	10x10 ft. apart...	435
6x6 ft. apart...	1,210	12x12 ft. apart...	302
8x8 ft. apart...	680	14x14 ft. apart...	222

Following Trees are 12-18 inch size

Variety	25	100	250
Sugar Maple, lumber	\$2.25	\$8.00	\$15.00
Yellow Buckeye, lumber..	2.25	8.00	15.00
Western Catalpa, posts....	1.75	5.00	10.00
White Flowering			
Dogwood, shade	2.75	10.00	22.00
American Beech, lumber..	2.25	8.00	15.00
White Ash, lumber	1.75	5.00	10.00
Honeylocust, windbreak ..	1.75	6.00	12.50
Osage Orange	2.25	8.00	15.00
Black Locust, posts	1.75	6.00	12.50

Note:—Orders cannot be accepted for less than 25 trees of a kind. Honeylocust and Black Locust are best for soil erosion prevention. Osage Orange is a fine wind-break variety. Other species available. In most cases shipments direct from specialty tree nursery. Order early, many varieties in short supply. Please name substitute varieties if possible.

BLACK WALNUT

Black Walnut is one of the most valuable timbers grown in the United States. Grow a black walnut orchard on your farm. 6 to 12 inch seedlings, 25 for \$2.00, 100 for \$7.00. By express, 250 for \$15.00.

CHINESE CHESTNUT

A very good quality nut. One of the best substitutes for the native American Chest-

nut which can be grown in the blight area. Trees bear early. 6-14 inch seedlings, 75c each; 2-3 feet tall, \$2.50 each.

SWEET BAY MAGNOLIA

(*Magnolia Virginiana Glauca*)

A tree with fragrant creamy white flowers and waxy light green foliage. Grows to about 20 ft. 3 to 4 ft. transplants BB \$3.25 each.

DOUBLE FLOWERING PEACH

LOMBARDY POPLAR

Slim, formal, quick growing columns that branch to the ground. Fine for screens and backgrounds. 3 to 4 ft. cuttings, 6 for \$1.50, 10 for \$2.50.

TULIP TREE OR YELLOW POPLAR

When you want lumber for building you will look far before finding any better than yellow poplar. 12 to 18 inch seedlings, 25 for \$2.00, 100 for \$7.00. By express, 250 for \$15.00.

RED BUD (Judas Tree)

A very ornamental tree of medium size with perfect heart-shaped leaves. Blooms early in spring, before leaves appear, covering the branches with small rosy-pink, pea-shaped flowers. 18 to 24 inch seedlings, 4 for \$1.00, 10 for \$2.00.

Blueberries

Have you ever eaten blueberry pie? Why not pick pie from an ornamental bush? Blueberry plants are very showy and attractive. The foliage is glossy green in spring, and blazing crimson in autumn. They can be planted in a group in practically any corner of a lot or a field.

We are offering the best fruited varieties developed by the U. S. Dept. of Agriculture. These include Adams, Cabot, Concord, Harding, Jersey, June, Pioneer, Rancoca³, Rubel, and Stanley.

The plants like acid soil. Soil can easily be made acid by adding rotted leaves, peat humus, or sawdust. Set the bushes 5x7 feet apart. A bush grown by itself will not bear fruit. Where 4 or more plants of different varieties are grown in close proximity per-

fect fertilization of the blossoms will take place, and the result will be abundant crops. Consequently, our blueberries are sold in units of 4 plants (mixed varieties) or in blocks of 8 plants or more (mixed). Each plant bears a name tag. Orders for single plants will not be accepted.

No one-year plants available.

	4 for	8 for	12 for
2 yr. 6-10 inch.....	\$4.00	\$7.20	\$ 9.60
2 yr. 12-15 inch.....	5.20	9.60	13.20
3 yr. 15-20 inch.....	8.00	15.20	21.60

All plants are separately B-B in earth in kraft paper. Name tag on each plant. Shipped F.O.B. Geneva, boxed.

GEMZATA

Strawberries for the Home Garden

HOW TO PLANT STRAWBERRIES

Plant strawberries in good, rich, well drained soil. The crown of the plant when set should be at the surface of the ground. Tamp the earth firmly around the roots, leaving a thin layer of loose soil at the top of the ground to prevent baking. It will take about 8,000 spring-bearing plants to the acre, or 10,000 everbearing plants. Keep ground clean and well cultivated. It is best to keep blossoms and runners on the everbearing varieties pinched off until the middle of July. In late fall, when the ground is frozen down an inch or two, cover with clean straw, leaves, or cornstalks, and do not uncover too early in the spring.

Order your strawberry plants before May 1st. We will accept no fall orders.

Our strawberries are all northern grown by specialists who grow nothing but strawberries. They will grow in practically any climate in the U. S.

Shipments Guaranteed — Replacements free of charge of plants and postage.

Standard Varieties

Blackmore—Early, long fruiting season. Perfect flowering. Large bright red berries. Honey sweet. Good shipper.

Dunlap—Early. Perfect flowering. Never fails to yield big red berries of delicious flavor. Large yielder. Hardy everywhere.

25 for \$1.00; 50 for \$1.50; 100 for \$2.75; 250 for \$5.00; 500 for \$9.00; 1000 for \$15.00.

Dorsett—Early. Vigorous, productive plants. Thrives New England, south to Virginia and Maryland, west to Missouri. Extra fine quality.

Fairfax—Early to mid-season. Perfect flowering. Heavy bearer. Rich and sweet.

Premier—Early. Very healthy and deep-rooted. Standard variety still in popularity. Large, firm berries.

Robinson—Most outstanding June-bearing variety. Firm, glossy, large conical shape, scarlet red. Good for table use.

25 for \$1.35; 50 for \$2.25; 100 for \$3.40; 250 for \$6.80; 500 for \$12.00; 1000 for \$21.00.

EVERMORE
(Minnesota 1166)

Ambrosia—Berries large, sparkling red, uniform, pointed shape, delicious flavor.

Catskill—Mid-season. Heavy yields and late cropper. Attractive large bright red berries.

Majestic — Best of newer June-bearing varieties. Easily grown. Best bearing record. High sugar content makes it excellent for table and canning. Very hardy.

Red Star—Very late. Large, bright red, fine quality, and very firm. Heavy producer of large showy berries. Large plants with short fruit stem, giving frost protection.

Sparkle—Late. Highest quality strawberry, ripens a week later than Premier. Large, vigorous plants produce runners freely making a good fruit row. Good in New England States.

Tennessee Shipper—Early. Cross of Blakemore and Missionary varieties. High quality, very productive. Retains large size throughout season.

25 for \$1.40; 50 for \$2.50; 100 for \$3.50; 250 for \$7.00; 500 for \$13.00; 1000 for \$23.00.

Evermore (Minnesota 1166)—Giant everbearer. Produces continuously through summer until late fall. Easy to grow, good pro-

ducer. Color of richest dark red clear through the berry. Delicious flavor.

25 for \$2.20; 50 for \$4.00; 100 for \$6.25; 250 for \$13.50; 500 for \$24.00; 1000 for \$38.00.

Streamliner—Most modern of all strawberries. Produces from July until freezing weather. Requires minimum of sugar, sweet as honey. Jumbo glossy red berries of uniform size.

25 for \$3.25; 50 for \$5.00; 100 for \$8.00; 250 for \$20.00; 500 for \$32.50; 1000 for \$58.00.

Giant Gem — Bears three months after planting, produces a crop in the fall, then the following season bears from June until frost. Fine flavor.

25 for \$1.75; 50 for \$3.00; 100 for \$5.00; 250 for \$10.00; 500 for \$17.00; 1000 for \$28.00.

Mastodon—Produces large crop summer and fall. Rich glossy red; firm solid texture.

25 for \$2.00; 50 for \$4.00; 100 for \$5.00; 250 for \$12.00; 500 for \$18.00; 1000 for \$30.00.

Gemzata—Everbearing. High quality and heavy producing. Large berries, rich red meat; firm and fine texture.

25 for \$2.75; 50 for \$4.25; 100 for \$6.75; 250 for \$14.00; 500 for \$25.00; 1000 for \$40.00.

HORMONE POWDER FOR BETTER CROPS

Clean the seed before planting. About 200 diseases affecting plants can be spread by spores present on seeds. Seed disinfection helps to prevent seed-borne diseases. Ramex Hormone is a scientific growth stimulant and seed disinfectant.

Flower, Vegetable, Ornamental Seeds. Dust seeds before sowing. Inoculate seed with hormones and vitamins. Helps prevent damping off and seed decay. Stimulates seedlings into stronger growth at the most critical period. A pinch for a packet of seeds.

Tree Seeds. Ramex Hormone kills with no guess work fungi or moulds which are carried on the hull of the seed and which attack the seedling after it germinates.

Lawn Seed. Plants from hormone-treated grass seed have nearly three times the root strength of plants from untreated seed.

Cuttings. Ornamental, deciduous and evergreen cuttings are dipped into the powder about one-half inch and then placed in rooting medium. Yew cuttings made in June hormone-treated, rooted 93 per cent.

Bulbs. Lillies, gladiolus and the like break dormancy more uniformly and develop more roots with hormone pre-dusting. Onion sets dusted, showed splendid results over untreated sets, in rows side by side.

Directions. One ounce treats a bushel of corn or small grain. One ounce is ample for treating all seeds for a large garden. Always mix thoroughly dry, never wet. Never use as a spray.

Note. When our supply of 3 oz. tins is exhausted, it may be impossible to obtain more due to shortage of tin. We will then have to pack the 3 oz. size into large packets.

Prices: ¼ oz. pkt. 25c, 1 oz. pkt. 50c, 3 oz. tin \$1.00, 1 lb. tin \$4.00, postpaid. The cost is small, the benefits large.

PLANT STIM

This is a complete Hormone, for treating of transplants of all kinds. Besides containing root forming Hormones and Vitamin B-1 and other members of the Vitamin B-1 complex which are important in plant growth, it has fungicidal value. Stimulates quick growth of transplants and prevents wilt. 3 oz. 50c, 1 lb. \$2.00.

TRANSPLANTONE

For treatment of transplants of all kinds. Contains the root forming hormones, vitamin B-1. Price ½ oz. 25c, 3 oz. \$1.00, 1 lb. \$4.00.

FULTON'S PLANTABBS

Odorless plant food in tablet form; supply a complete balanced plant food including Vitamin B-1. 10c size, 25c size, 50c size, and \$1.00 size.

Grow Evergreens from Seed

Spruce, Pine and Fir seed germinate in from 15 to 30 days after sowing. The factors to control from seed are dampening off and weeds. For small planting a good method is to use flats 3 to 4 inches deep without wood bottoms. Use $\frac{1}{4}$ -inch wire mesh bottoms. Place flats under lath shade outdoors, about 2 inches higher than ground level. Fill flats with sterilized soil made up of one-half sand and one-half garden soil. A seed bed 10 feet long and 4 feet wide contains room for 4000 to 5000 seedlings. Do not sow evergreen seeds in hotbeds and cold frames. They must have ample side air circulation. Plan an evergreen seedling garden. It will be very useful.

EVERGREEN SEED LIST

Abies (Fir)

- Abies Amabilis—White Fir
- Abies Balsamea—Balsam Fir
- Abies Concolor—Silver Fir
- Abies Grandis—Grand Fir
- Abies Fraseri—Fraser Fir
- Abies Lasiocarpa—Alpine Fir
- Abies Lasiocarpa Arizonica—Corkbark Fir
- Abies Magnifica Shastensis
- Abies Nordmanniana—Nordmann Fir
- Pseudotsuga Taxifolia Glauca—Hardy Douglas Fir

Arborvitae

- Thuja Occidentalis—American Arborvitae
- Thuja Orientalis—Oriental Arborvitae
- Thuja Orientalis Aurea—Golden Arborvitae
- Thuja Orientalis Aurea Nana—Berckman's Arborvitae
- Thuja Aurea Conspicua—Goldspire Arborvitae
- Thuja Plicata—Giant Arborvitae

Chamaecyparis (Cypress)

- Chamaecyparis Lawsonia—Lawson Cypress
- Chamaecyparis Lawsonia Argentea—Silver Cypress
- Chamaecyparis Lawsonia Pendula Glau-

ca—Weeping Cypress

Juniperus (Juniper)

- Juniperus Platte—Platte River Juniper
- Juniperus Scopulorum—Silver Juniper
- Juniperus Virginiana—American Red Cedar

Picea (Spruce)

- Picea Albertiana Glauca—Alberta White Spruce
- Picea Densata Glauca—Black Hill Spruce
- Picea Engelmanni Glauca—Engelmann Spruce
- Picea Pungens—Colorado Blue Spruce
- Picea Mariana—Black Spruce
- Picea Sitchensis—Sitka Spruce
- Picea Glauca—White Spruce

Pinus (Pine)

- Pinus Banksiana—Jack Pine
- Pinus Jeffreyi—Jeffrey Pine
- Pinus Mugo—Mugho Pine
- Pinus Nigra—Austrian Pine
- Pinus Pinea—Italian Stone Pine
- Pinus Ponderosa—Western Yellow Pine
- Pinus Pungens—Table Mountain Pine
- Pinus Radiata—Monterey Pine
- Pinus Strobus—White Pine
- Pinus Sylvestris—Scotch Pine

Tsuga (Hemlock)

- Tsuga Canadensis—Canadian Hemlock
- Tsuga Carolina—Carolina Hemlock
- Larix Decidua—European Larch
- Ginkgo Biloba—15 seeds.

Orders: All seed orders are subject to previous sale. Delivery cannot be guaranteed unless orders are placed promptly.

Price: 25c per packet; 5 packets your choice \$1.00. Each packet contains sufficient seed to produce 100 to 400 seedlings. Trade packets 75c each, 3 for \$2.00. Trade packets contain sufficient seed to produce 500 to 1000 seedlings or more depending upon variety. All postpaid with complete instructions.

Mixed Evergreen Seeds, made up from varieties listed, extra large packets, 25c, 3 packets 50c, postpaid.

Seeds also sold at pound rate. Please write for larger quantities.
